PETITION
:
:
UNDER 37 CFR 1.47(b)

This is a decision on petition under 37 CFR 1.47(b), filed 06 November 2006 to permit petitioner (applicant) to file the above-captioned application on behalf of the non-signing inventor Kurt Stege. Petitioner requested a five month extension of time, which is granted.

BACKGROUND

On 28 June 2004, applicant filed international application No. PCT/EP04/06991 which claimed a priority date of 27 June 2003, and which designated the United States. A copy of the international application was communicated to the United States by the International Bureau on 06 January 2005.

On 23 December 2005, within 30 months from the priority date, applicant filed a transmittal letter for entry into the national stage in the United States which was accompanied by, *inter alia*, basic national filing fee.

On 4 April 2006, the United States Designated/Elected Office (DO/EO/US) mailed a NOTIFICATION OF MISSING REQUIREMENTS indicating that the oath or declaration of the inventor, in compliance with 37 CFR 1.497(a) and (b) must be furnished within two months from the mail date of the notice or the application would be abandoned. Extensions of time were available.

On 06 November 2006, petitioner filed the instant petition requesting that the above-identified application be accepted under the provisions of 37 CFR 1.47(b). The petition was accompanied by a declaration of Dr. Tim Bast and a copy of a German Claiming Letter signed by the inventor.

DISCUSSION

A petition under 37 CFR 1.47(b) must be accompanied by (1) the requisite petition fee, (2) factual proof that the inventor refuses to execute the application or cannot be reached after diligent effort, (3) a statement of the last known address of the inventor, (4) an oath or declaration by the 37 CFR 1.47(b) applicant on behalf of and as agent for the non-signing inventor, (5) proof that the 37 CFR 1.47(b) applicant has sufficient proprietary interest in the application, and (6) a

showing that such action is necessary to preserve the rights of the parties or to prevent irreparable damage.

Petitioner has satisfied Item (1) with payment of the requisite petition fee and Item (3) with a statement of the last known address of the inventor.

As for Item (4), petitioner has provided a declaration, in compliance with 37 CFR 1.497(a) and (b) and executed on behalf of the inventor by the 37 CFR 1.47(b) petitioner and is required. Item (4) is satisfied.

With regard to Item (2), a statement by Dr. Tim Bast, European Intellectual Property Counsel for Harmon International Industries, Inc. was provided. Dr. Bast indicates that Janine Doss, an Assistant, contacted the nonsigning inventor to obtain his signature on the declaration. A first hand statement from Ms. Doss to prove the inventor refused to sign is required. A copy of said correspondence to the nonsigning inventor was provided; however an English translation of this correspondence was not provided and is required. Proof of delivery of a complete copy of the application and the declaration would be helpful and should be submitted as part of the renewed petition under 37 CFR 1.47(b). Although attempts to contact the nonsigning inventor via telephone at his current employment was mentioned, such details should be provided by someone having first hand knowledge of these attempts, noting the time and date of the call and whether a message was left.

Petitioner must provide proof that the inventor was presented with a copy of the application papers (including specification, claims, and any drawings) in order to conclude that the inventor refuses or is unavailable to sign the application. See MPEP 409.03(d), which states in pertinent part, "a refusal by an inventor to sign an oath or declaration when the inventor has not been presented with the application papers does not itself suggest that the inventor is refusing to join the application unless it is clear that the inventor understands exactly what he or she is being asked to sign and refuses to accept the application papers." Here, Petitioner has not provided clear evidence from someone having first hand knowledge that nonsigning inventor was presented with a copy of the application papers and that he refused to sign the application at issue. Petitioner must present sufficient evidence to conclude that the inventor refuses to sign the application. The statement of someone having first hand knowledge of the facts is required. See MPEP 409.03(d) for further instructions. Item (2) is not satisfied.

Regarding Item (5), Section 409.03(f) of the MPEP, Proof of Proprietary Interest, states, in part:

When an application is deposited pursuant to 37 CFR 1.47(b), the 37 CFR 1.47(b) applicant must prove that

- (A) the invention has been assigned to the applicant, or
- (B) the inventor has agreed in writing to assign the invention to the applicant, or
- (C) the applicant otherwise has sufficient proprietary interest in the subject matter to justify the filing of the application.

If the application has been assigned, a copy of the assignment (in the English Language) must be submitted. The assignment must clearly indicate that the invention described in the 37 CFR 1.47(b) application was assigned to the 37 CFR 1.47(b) applicant. A statement under 37 CFR 3.73(b) by the assignee must also be submitted (see MPEP § 324)....

When an inventor has agreed in writing to assign an invention described in an application deposited pursuant to 37 CFR 1.47(b), a copy of that agreement

should be submitted. If an agreement to assign is dependent on certain specified conditions being met, it must be established by a statement of facts by someone with first hand knowledge of the circumstances in which those conditions have been met. A typical agreement to assign is an employment agreement where an employee (nonsigning inventor) agrees to assign to his or her employer (37 CFR 1.47(b) applicant) all inventions made during employment. When such an agreement is relied on, it must be established by the affidavit or declaration of a person having firsthand knowledge of the facts that the invention was made by the employee while employed by the 37 CFR 1.47(b) applicant.

If the invention has not been assigned, or if there is no written agreement to assign, the 37 CFR 1.47(b) applicant must demonstrate that he or she otherwise has a sufficient proprietary interest in the matter.

A proprietary interest obtained other than by assignment or agreement to assign may be demonstrated by an appropriate legal memorandum to the effect that a court of competent jurisdiction (federal, state, or foreign) would by the weight of authority in that jurisdiction award title of the invention to the 37 CFR 1.47(b) applicant. The facts in support of any conclusion that a court would award title to the 37 CFR 1.47(b) applicant should be made of record by way of an affidavit or declaration of the person having firsthand knowledge of same. The legal memorandum should be prepared and signed by an attorney at law familiar with the law of the jurisdiction involved. A copy (in the English language) of a statute (if other than the United States statute) or a court decision (if other than a reported decision of a federal court or a decision reported in the United States Patents Quarterly) relied on to demonstrate a proprietary interest should be made of record.

In the instant case, no assignment signed by the inventor was attached to the petition to prove this interest.

Where there is no written agreement to assign or the invention has not been assigned, petitioner must demonstrate a proprietary interest by an appropriate legal memorandum. No such memorandum accompanied the petition.

Here Petitioner, in attempting to prove that the 37 CFR 1.47(b) applicant has sufficient proprietary interest in the subject matter to justify filing the application, provided a copy of a German Claiming Letter. However, the claiming letter does not identify the above referenced U.S. application or PCT application. A proprietary interest may be demonstrated by an appropriate legal memorandum to the effect that a court of competent jurisdiction (federal, state, or foreign) would by the weight of authority in that jurisdiction award title of the invention to the 37 CFR 1.47(b) applicant. The facts in support of any conclusion that a court would award title to the 37 CFR 1.47(b) applicant should be made of record by way of an affidavit or declaration of the person having firsthand knowledge of same. The legal memorandum should be prepared and signed by an attorney at law familiar with the law of the jurisdiction involved. A copy (in the English language) of a statute (if other than the United States statute) or a court decision (if other than a reported decision of a federal court or a decision reported in the United States Patents Quarterly) relied on to demonstrate a proprietary interest should be made of record.

Where the employee (nonsigning inventor) agreed to assign to his or her employer (37 CFR 1.47(b) applicant) all inventions made during employment, a copy of the employee agreement must be provided along with a firsthand knowledge statement that the invention was made by the employee while employed by the 37 CFR 1.47(b) applicant and that all conditions were met is required. When such an agreement is relied on, it must be established by the affidavit

or declaration of a person having firsthand knowledge of the facts that the invention was made by the employee while employed by the 37 CFR 1.47(b) applicant. Item (5) is not satisfied.

As for Item (6), irreparable damage may be established by a showing (a statement) that a filing date is necessary to preserve the rights of the party and to prevent irreparable damage. Such statement has been presented in paragraph (J) of the petition. Thus, item (6) is satisfied.

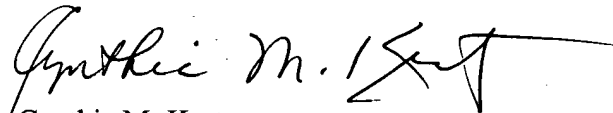

Accordingly, items (2) and (5) above have not been satisfied and the petition under 37 CFR 1.47(b) must be dismissed.

CONCLUSION

The petition under 37 CFR 1.47(b) is **DISMISSED WITHOUT PREJUDICE**.

If reconsideration on the merits of this petition is desired, a proper response must be filed within TWO (2) MONTHS from the mail date of this decision. Any reconsideration request should include a cover letter entitled "Renewed Petition Under 37 CFR 1.47(b)." No additional petition fee is required. Extensions of time may be obtained under 37 CFR 1.136(a).

Any further correspondence with respect to this matter should be addressed to the Mail Stop PCT, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450, with the contents of the letter marked to the attention of the Office of PCT Legal Administration.
